## **SUPPLEMENTARY INFORMATION:**

I. I. Background.

In accordance with § 51.118 of Title 10 of the *Code of Federal Regulations*, the NRC is making available final Supplement 54 to the GEIS regarding the renewal of Exelon operating licenses NPF-37 and NPF-66 for an additional 20 years of operation for Byron. Draft Supplement 54 to the GEIS was noticed by the NRC in the *Federal Register* on January 2, 2015

(80 FR 55), and noticed by the Environmental Protection Agency on January 2, 2015 (80 FR 41). The public comment period on draft Supplement 54 to the GEIS ended on February 20, 2015, and the comments received are addressed in final Supplement 54 to the GEIS. Final Supplement 54 to the GEIS is available as indicated in the ADDRESSES section of this document.

## II. Discussion.

As discussed in chapter 5 of the final Supplement 54 to the GEIS, the NRC determined that the adverse environmental impacts of license renewal for Byron are not so great that preserving the option of license renewal for energy-planning decisionmakers would be unreasonable. This recommendation is based on: 1) the analysis and findings in the GEIS; 2) information provided in the environmental report and other documents submitted by Exelon; 3) consultation with Federal, State, local, and Tribal agencies; 4) the NRC staff's independent environmental review; and 5) consideration of public comments received during the scoping process and on the Draft Supplemental Environmental Impact Statement.

Dated at Rockville, Maryland, this 16<sup>th</sup> day of July 2015.

For the Nuclear Regulatory Commission.

James G. Danna, Chief, Projects Branch 2, Division of License Renewal, Office of Nuclear Reactor Regulation.
